

ARC-DBSN 2 Metre Dual Strip Stair Nosing LED Profile (Black)

Product Code: ARC-DBSN

Product Overview

The ARC-DBSN 2 Metre Dual Strip Stair Nosing LED Profile (Black) is a high-functionality stair lighting solution that pairs safety (non-slip insert) with clean, integrated illumination and a professional finish. It is ideal for both residential and commercial stairs where visibility and aesthetics matter. The included diffuser and insert enhance the finished look, but remember to plan for compatible LED tape and electrical routing ahead of installation. The included non-slip insert provides traction for foot traffic while concealing screws and wiring once installed — a key safety and aesthetic benefit versus plain edge trims.

Technical Specifications

Specification	Details
Product Code	ARC-DBSN
