### TECHNICAL INSTRUCTIONS

### PRODUCT OVERVIEW

The ARC-TI12 is a premium flush tile-in LED profile designed for seamless integration into tiled surfaces, providing a sleek and refined lighting solution. Its 12 mm internal width is ideal for housing LED strip lights, offering smooth and even illumination that enhances the aesthetics of modern interiors. Crafted from high-quality aluminium with an anodised silver finish, the ARC-TI12 combines durability with contemporary design. The flush tile-in configuration allows the profile to sit level with surrounding tiles, creating a clean transition between illuminated elements and tiled surfaces — perfect for kitchens, bathrooms, stairways, feature walls, and architectural lighting accents. At a length of 2 metres, this profile delivers a continuous lighting run suitable for larger installations while still allowing for easy on-site trimming to fit bespoke applications. Designed to complement both functional and decorative lighting schemes, the ARC-TI12 provides a professional finish that enhances both performance and visual appeal.
