### TECHNICAL DRAWING WITH DIMENSIONS

### TECHNICAL INSTRUCTIONS

### PRODUCT OVERVIEW

The ARC-SWTI is a high-quality single-wing tile-in LED profile designed to create a neat and professional finish where tiles meet illuminated surfaces. With an internal width of 10.5 mm, this profile is sized to house slim LED strip lights, providing integrated ambient illumination along the edge of tiled areas. Crafted from durable aluminium with an anodised silver finish (also available in black), the ARC-SWTI profile combines practical performance with contemporary style. The single-wing design allows it to sit flush with adjacent tiles, offering a smooth transition between tiled surfaces and lighting elements.

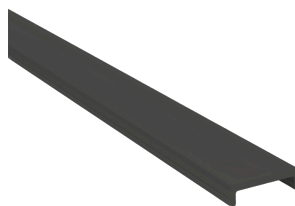

At a length of 2 metres, this profile gives a continuous run of integrated lighting that can be trimmed to suit the dimensions of your installation. Suitable for a range of interior applications — from kitchens and bathrooms to feature walls and decorative installations — the ARC-SWTI enhances both the look and functionality of your space by seamlessly integrating LED lighting into tiled edges.
